## Reflow Profile

■ Reflow Temp/Time

NOTES:

1. We recommend the reflow temperature $245^{\circ} \mathrm{C}\left( \pm 5^{\circ} \mathrm{C}\right)$.the maximum soldering temperature should be limited to $260^{\circ} \mathrm{C}$.
2. dont cause stress to the epoxy resin while it is exposed to high temperature.
3. Number of reflow process shall be 2 times or less.
-Soldering iron
Basic spec is $\leq 5 \sec$ when $260^{\circ} \mathrm{C}$. If temperature is higher, time should be shorter $\left(+10^{\circ} \mathrm{C} \rightarrow-1 \mathrm{sec}\right)$.Power dissipation of iron should be smaller than 20 W , and temperatures should be controllable . Surface temperature of the device should be under $230^{\circ} \mathrm{C}$.

## - Rework

1. Customer must finish rework within 5 sec under $260^{\circ} \mathrm{C}$.
2. The head of iron can not touch copper foil
3. Twin-head type is preferred.

Avoid rubbing or scraping the resin by any object, during high temperature, for example reflow , solder etc.

## Test circuit and handling precautions

■ Test circuit

- Handling precautions

1. Over-current-proof

Customer must apply resistors for protection; otherwise slight voltage shift will cause big current change (Burn out will happen).
2. Shelf life in sealed bag: 12 month at $5^{\circ} \mathrm{C} \sim 30^{\circ} \mathrm{C}$ and $<60 \%$ R.H;
3. After the package is Opened:
3.1. It is recommended to baking before the first use:

Baking condition:
a. $60 \pm 3^{\circ} \mathrm{C} \times(36 \sim 48 \mathrm{hrs})$ and $<5 \% \mathrm{RH}$, taped reel type ;
b. $110 \pm 3^{\circ} \mathrm{C} \times(8 \sim 16 \mathrm{hr})$, bulk type ;
3.2 The products should be used within a week or they should be keeping to stored at $\leqq 20$ R.H. with zip-lock sealed:
a. It is recommended to baking before soldering when the pack is unsealed after 72 hrs ;
b. Baking condition as 3.1 baking condition.

- Dimensions of Tape (Unit: mm)

- Arrangement of Tape

## NOTES

1. Empty component pockets are sealed with top cover tape;
2. The maximum number of missing lamps is two;
3. The cathode is oriented towards the tape sprocket hole;
4. 2,000(Max)pcs/Reel

NOTES:
Reeled products [numbers of products are 2,000(Max)pcs] packed in a seal off moisture-proof bag along with desiccant and Humidity card one by one, Seven moisture-proof bag of maximums [total maximum number of products are $14,000(\mathrm{Max}) \mathrm{pcs}$ ] packed in an inside box (size: about $238 \mathrm{~mm} x$ about $194 \mathrm{~mm} x$ about 102 mm ) and four inside boxes of maximums are put in the outside box (size: about $410 \mathrm{~mm} x$ about 254 mm x about 229mm) Together with buffer material, and it is packed. (Part No., Lot No., quantity should appear on the label on the moisture-proof bag, part No. And quantity should appear on the label on the cardboard box.) The number of the loading steps of outside box (cardboard box) has it to three steps.
