

TD217 Series

SSOP4, DC Input, Photo Transistor Coupler

Description

The TD217 series combine an AlGaAs infrared emitting diode as the emitter which is optically coupled to a silicon planar phototransistor detector in a plastic DIP4 package with different lead forming options.

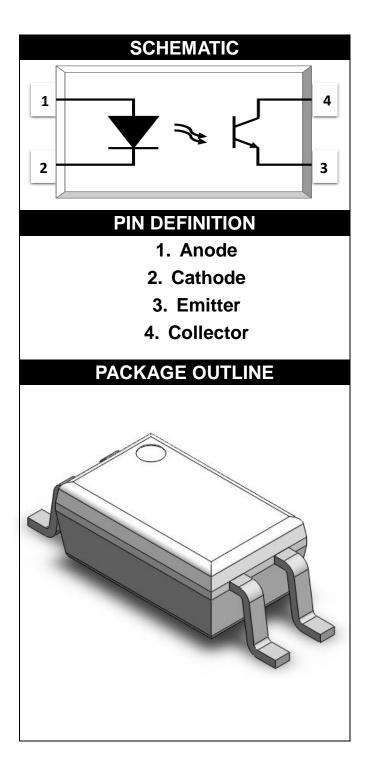

With the robust coplanar double mold structure, TD217 series provide the most stable isolation feature.

Features

- High isolation 5000 VRMS
- CTR flexibility available see order information
- DC input with transistor output
- Operating temperature range 55 °C to 110 °C
- REACH compliance
- Halogen free
- MSL class 1

Applications

- Switch mode power supplies
- Programmable controllers
- Household appliances
- Office equipment
